## foot and leg options

Wood Foot

Square Metal Leg

Round Metal Leg

Sled Base

## top options

Low Table Top

## back options

Standard Back Height

Mid-Back Height

### Options

Feet are offered in wood (maple or oak), metal and sled base. Top surfaces are offered in upholstered or thermoformed table tops.

### Backs

The frame consists of 3/8" plywood covered with molculon urethane foam with a thickness of 5" and 20 lb IFD. The mid-back option adds 4" to the height of the chair and COM yardage increases by .25 yards per chair.

### Base Frame

The frame consists of 3/4" and 3/8" plywood and poplar onto which webbing is stretched to create a live seat. There is a 1/2", 45 lb urethane foam wrapped around the exterior of the base, with the exception of the sides which are wrapped in 3/4" foam.

### Seat

Seat cushion core is 3.5" thickness and 29 lb IFD of molculon urethane foam.

### Table Top Surfaces

Table surfaces on the table and ottoman are offered in thermoform. Thermoform is fire resistant and also has a high resistance to impact, chemicals and cleaning agents.

### Power

Durable die-cast construction. UL listed with two 120V outlets or one USB and one 120V outlet. Both options have a 12 foot pigtail. Power units are not tamper resistant. Specify in black or silver.

### Ganging Device

Units are ganged with polyester strapping that latches with a steel over-center buckle. Buckle may be locked with optional threaded fastener. Units can only be ganged from the angled sides, not front or rear.

### COM

Customer's Own Material is estimated yardage based on 54" wide, solid-color fabric. Actual required yardage may vary depending on special instructions for matching direction of pattern. A sample must be submitted to determine actual yardage needed and any additional up-charge.

### Moisture Barrier

Sauder laminates a waterproof polyurethane membrane to the polymeric urethane foam on the seat. It is waterproof, mildew-proof, and washable.

### Cal TB 133 Specifications

All seating products can pass Cal TB 133 when appropriate materials are specified.

### Assembly and Disassembly

All major components are assembled and disassembled with no threaded fasteners. Instead, they are secured by means of hidden interlocking metal fasteners that do not require a tool to engage or disengage. Ottoman and table require minimal use of a 3/16" hex wrench.

### Warranty

This product is warranted against defects in materials and workmanship for a period of 25 years (3 year warranty on foam) from date of delivery. Casters are warranted for 3 years. Sauder Program Fabrics are warranted for 3 years.

### Note

Fabrics shown in this literature were readily available at the time of photography. However, Sauder Education cannot guarantee continuing availability of any fabric or finish.
